

# FSC Two Relay Controllable System

FSC offers flexible and scalable solutions that satisfy and exceed the requirements of both owners and occupants alike. FSC integrates all aspects of lighting controls, including, low voltage, dimming, occupancy sensing, daylight harvesting and now a **Two Relay Controllable System**, providing clients with the most energy efficient fixtures available in the marketplace.

## Warehouses

### ***FSC can help you employ unbeatable control strategies:***

*Two Relay Sensor: Occupancy and Photocell*

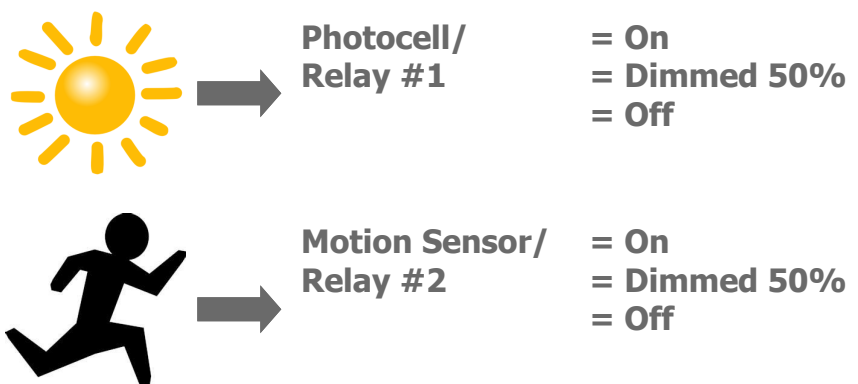

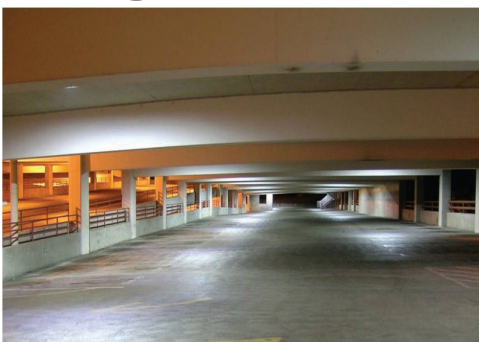

- The occupancy sensor relay can be wired to the step dimming ballast and photocell relay can be wired to override the complete fixture

Or

- The photocell relay can be wired to the step dimming ballast and occupancy sensor relay can be wired to override the complete fixture

The industry's first tri-level fixture using only one sensor and one ballast for up to six T8 lamps. Perfect for any application with ambient light.

## Garages

## One Sensor... One Ballast... Three Functions...
